PROFESSIONAL SUMMARY

Computer Science graduate and QA Intern with hands-on experience in manual testing of web and mobile applications, defect reporting, basic API testing, and SQL. Skilled in test case design, regression testing, and using Jira and Postman to support software quality for learning and gaming products. Currently learning Playwright and Data Science with Python to grow into QA automation and data-focused quality engineering.

TECHNICAL SKILLS

Programming: Python, SQL, Java, C++

Testing: Manual Testing, Functional Testing, Regression Testing, UI Testing, Test Case Design, Defect Reporting

Tools: Jira, Postman, Swagger, GitHub, VS Code, Office 365

Database: MySQL, SQL Queries

Concepts: SDLC, STLC, Defect Life Cycle, Networking Fundamentals

Soft Skills: Communication, Teamwork, Critical Thinking, Adaptability

EXPERIENCE

QA Intern — Dark Matter Production Pvt. Ltd.

May 2026 – Present

Kathmandu, Nepal

- Test web and mobile learning and gaming applications manually to verify functionality and user experience.
- Design and execute test cases based on requirements and report defects using Jira.
- Perform basic API testing using Postman and Swagger and help verify bug fixes with developers.
- Collaborate with product and development teams to improve test coverage and overall application quality.

PROJECTS

Daraz E-Commerce QA Automation Framework | [Project Link](#)

2026

Tech Stack: Python, Playwright, Pytest, Requests, Allure, Docker, GitHub Actions

- Built an end-to-end QA automation framework using Python, Playwright, Pytest, and Page Object Model.
- Automated UI and API testing, including product search, login, guest cart validation, CRUD APIs, and JSON schema validation.
- Integrated Allure reporting, logging, cross-browser testing, parallel execution, Docker, and GitHub Actions CI.

AeroGuard: Aircraft Damage Detection | [Live Demo](#)

April 2025

Tech Stack: Python, TensorFlow, OpenCV, Deep Learning, Gradio UI

- Developed aircraft damage detection models using deep learning and computer vision techniques.
- Trained and tested models to improve defect detection accuracy and overall performance.
- Built and evaluated a demo interface for model visualization and prediction.

Multimodal Sentiment Analysis

Sep 2024

Tech Stack: Python, Deep Learning, OpenCV, CNNs, NLP

- Built a multimodal sentiment analysis system using textual and visual data.
- Applied CNN and NLP techniques for sentiment prediction.
- Improved performance through multimodal feature fusion and model tuning.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2021 – 2025

Kalinga Institute of Industrial Technology (KIIT)

Bhubaneswar, Odisha, India

Higher Secondary Education (CBSE)

2018 – 2020

Delhi Public School, Birgunj

Birgunj, Nepal

COURSES & CERTIFICATIONS

Data Science with Python — TechAxis Nepal

Currently pursuing (2026)

Python for data analysis, visualization, statistics, and machine learning basics.

- Prompt Engineering for ChatGPT
- Generative AI: Introduction and Applications
- Generative AI: Prompt Engineering Basics

ACADEMIC ACHIEVEMENTS

- Received **fully funded scholarship** for undergraduate studies by the Indian Government under the SII Scholarship scheme by getting top rank among 500000+ applicants (2021–2025). [Link](#)
